

# INFORMATION IS AT YOUR FINGERTIPS WITH WORKFORCE ANALYTICS

May 7, 2018 – Payworks is excited to introduce its new Workforce Analytics platform. Analytics adds tremendous value to the Payworks suite of total workforce management solutions, including Time Management and HR, by putting clients in complete control of their workforce data and providing insight into company performance.

“In today’s fast-paced business environment, it’s critical that organizations make good data-driven decisions,” says Myles Halliday, VP, Product Management at Payworks. “Analytics facilitates this by giving organizations access to their data in a format where they can see trends and anomalies and quickly get answers to their questions.”

Payworks Workforce Analytics was designed for payroll and HR professionals, as well as business leaders who are looking for a business intelligence tool that will allow them to quickly review consolidated data across years and generate timely reports.

“We’re thrilled to bring the newest in reporting analytics to our clients,” says JP Perron, President at Payworks. “Not only is this new business intelligence offering easy to master, it provides powerful filtering and dashboarding capabilities such that companies can answer complex business questions all within our existing suite of payroll, human resources, and time management solutions.”

Attendees at the Canadian Payroll Association’s Annual Conference and Trade Show in Ottawa, Ontario on June 27 can experience the new Analytics platform at the Payworks booth and Demo Lounge area.
