

TANDEM

Payroll. Benefits. Synchronized.

Payworks and Johnston Group make payroll and benefits administration effortless through the real-time integration of their platforms

September 29, 2017 – Payworks and Johnston Group have introduced Tandem, a proprietary integration of their payroll and benefits platforms. The seamless integration is the first of its kind for Canadian business and works by synchronizing a user's payroll and benefits data in real time.

Designed exclusively for Payworks and Johnston Group clients, Tandem builds on the one-way integration technology the companies introduced in 2015 by further simplifying the costly and time-consuming processes of payroll and benefits administration.

“Johnston Group is a valued partner, and our teams were dedicated to developing a truly innovative solution to the common administrative challenges experienced by payroll and human resource professionals,” says JP Perron, President of Payworks. “Though the development effort required was complex, our teams have created a solution that is very easy for clients to use and will provide significant time savings.”

Tandem customers will also gain unlimited access to the Payworks and Johnston Group service teams. “As payroll and benefits providers, we share a commitment to world-class service. Tandem not only offers clients a synchronized solution free of charge, it also allows them access to ongoing, knowledgeable service and our expert insurance advisor network,” says Dave Johnston, CEO of Johnston Group.
